22 August
2019

- ACCESS AND BENEFIT SHARING
- TECHNOLOGY TRANSFER
- CROSS CUTTING

Side Event
Conference Room C
1.15-2.30

Developing Mare Geneticum:
Notifying, sharing, rewarding
and sustaining

We will explore commercialisation of marine genetic resources in areas beyond national jurisdiction.

We will build on proposals for Mare Geneticum and prior notification, to deliver a pragmatic solution for science.

Key themes

- links between access and benefit sharing, commercialisation and the integrity of the ecosystem
- IP, trade secrets, MGR and open access databases
- approaches to MGR in situ, ex situ and digital sequence information and derivatives.
