

Royal Society Visit - 7 March

The Royal Society visited the University on 7 March 2019 to present an overview of their funding schemes and sharing hints and tips on how to apply. The Royal Society mission is to recognise, promote and support excellence in science and to encourage the development and use of science for the benefit of humanity. It achieves this through funding some of the most fundamental, significant and life-changing discoveries in many research areas. Members of our academic community also shared their experiences of applying and managing awards from the Royal Society.
