

Mapping Against the UK Quality Code SECTION 2: ASSESSMENT

Academic Services | Quality & Policy academicservices@abdn.ac.uk

Authored: January 2022 | Updated: March 2024

SECTION 2: ASSESSMENT

INTRODUCTION

The Quality Code is split into 12 themes, available online on the QAA website at https://www.qaa.ac.uk/quality-code. Assessment, as one of the key themes, is critically important in ensuring the academic standards and integrity of University degrees. Each student must be assessed fairly and appropriately for the courses in which they partake, and should be recognised accordingly. The code describes this theme as follows:

Assessment is a fundamental aspect of the student learning experience. Engagement in assessment activities and interaction with staffand peers enables learning, both as part of the task and through review of their performance. It is a vehicle for obtaining feedback. Ultimately, it determines whether each student has achieved their course's learning outcomes and allows the awarding body to ensure that appropriate standards are being applied rigorously. Deliberate, systematic quality assurance ensures that assessment processes, standards and any other criteria are applied consistently and equitably, with reliability, validity and fairness.

In practice, this means that assessments should be appropriate for the course and level, and should assess students fairly, consistently and rigorously. This means that approval processes should also be fair, consistent and robust. In handling assessment, the University should also ensure robust policies and procedures to manage the diverse array of courses, programmes and assessments.

In defining key terms that will be used frequently in this section, the Quality Code notes the following:

Formative assessment: Assessment with a developmental purpose, designed to help learners learn more effectively by giving them feedback on their performance and how it can be improved and/or maintained. Reflective practice by students sometimes contributes to formative assessment.

Summative assessment: Used to indicate the extent of a learner's success in meeting the assessment criteria to gauge the intended learning outcomes of a module or course. Typically, within summative assessment, the marks awarded count towards the final mark of the course/module/award.

Module: Aself-contained, formally structured unit of study, with a coherent and explicit set of learning outcomes and assessment criteria. Some providers use the word 'course' to refer to individual modules.

SECTION 2: ASSESSMENT

The Quality Code has three different sections: the expectations for standards; the expectations for quality; and the guiding principles. The relevant expectations for standards and quality are detailed below. The Guiding Principles are mapped to the University's own policies, procedures and quality mechanisms. There are two separate sections for the University's practices, detailing what the University does and has in place to support that expectation/principle, as well as the supporting documentation, which includes reference to supporting policy, procedure, website or other document.

	experience.

GUIDING PRINCIPLES	UNIVERSITYPRACTICES	SUPPORTING DOCUMENTATION
	GUIDING PRINCIPLES	
1. Assessment methods and criteria are aligned to learning outcomes and teaching activities. There is alignment between intended learning outcomes, teaching strategies, methods of assessment and assessment criteria. Constructive alignment is a model where learning environments and activities are designed to enable all students to achieve the desired learning outcomes, measured through assessment activities using clearly aligned criteria. Learning outcomes, assessment criteria and learning and teaching activities are developed in accordance with the academic level of study, using appropriate descriptors and consistent language. They reflect course and module aims as well as other factors where appropriate, such as professional, statutory and regulatory body (PSRB) requirements.	 The University operates a robust system of Programme and Course approval and review that ensures that Intended Learning Outcomes (ILOs) and assessment are aligned, and that appropriate teaching and learning strategies are then deployed to support students in meeting the ILOs to the best of their abilities. This system follows the principles of Biggs' Constructive Alignment model, setting learning and the assessment of that learning at the heart of the student experience. The system comprises the following stages: Academic staff discuss informally a course or programme proposal with their relevant Head of School / Discipline. This might be a new provision or modification to an existing provision. The University's Curriculum Management System (CMS) requires those submitting course proposals to set out the ILOs and align them with relevant assessments and teaching activities. The system utilises an inbuilt 'ready reckoner' to assist academic staff in ensuring that their ILOs are of an appropriate level, based on a 3D version of Blooms' Taxonomy (see link opposite). In this way, Schools are required to ensure that every assessment has associated intended learning outcomes for students to engage in their learning. At this stage, requirements of Professional, Statutory and Regulatory Bodies (PSRB) are taken into account and alignment with these is ensured and highlighted. Course and Programme proposals are submitted to the University's Quality Assurance Committee (QAC) for scrutiny and advice. Approvals of course and programme proposals are considered by a group of QAC members (themselves academic staff) to oversee and scrutinise proposals and offer advice and support to applicants. This ensures that the focus is on process rather than subject. The designated QAC member is tasked with ensuring that the ILOs are appropriate to the SCQF level of the provision, that the assessment method(s) is /are realistic and appropriate and that the amount of assessment is consistent with	Course and Programme Approvals (Webpage) Types of Assessment, Academic Quality Handbook (Document) Video Guidance: Devising Learning Outcomes Using Blooms' Taxonomy

level are comparable in terms of qualification and level descriptors, assessment criteria, Subject Benchmark Statements, and, where applicable, PSRB requirements. Assessment criteria are sufficiently robust to ensure reasonable parity between the judgements of different assessors. Policies and procedures for marking assessments and moderating marks are clearly articulated, consistently operated and regularly reviewed. Where borderline marks are identified, policies for the consideration of grades to be awarded are consistent, fair and freely available to staff and students. The validity of an assessment - how well a test measures what it claims to measure - is reviewed through annual and periodic review, supported by external subject specialists and external	students to understand their feedback in general terms (e.g. at what level they are performing) before then going on to read the more detailed comments on their assessments. Alongside this, the subject External Examiners appointed by the School review assessments as part of the process of setting assessment and providing feedback to the School on their appropriateness. External Examiners also provide feedback by means of formal Examiners' Meetings as well as their formal annual report. This report is escalated via QAC to ensure institutional oversight of the issues raised in the report and feedback is provided to the External Examiner. The External Examiners' Reports are uploaded to MyAberdeen to ensure the closure of the feedback loop to students. These individual elements, whilst robust in themselves, are in turn scrutinised in a holistic manner every five years as part of the University's Internal Teaching Review (ITR). Schools are required to complete and submit an evidence-based Critical Analysis and Curriculum Map as part of their ITR submission. Annual Programme Reviews, External Examiner Reports, and School learning and teaching metrics reviewed as part of the Annual School Planning Process are also considered. The ITR team comprises academic staff from different disciplines with the University, alongside OAC members and an appropriate number of external assessors	
3. Assessment design is approached holistically. Assessment is designed 'top down' - beginning with the award, then going down into module level (where appropriate). Assessment design considers all modes of course delivery and environment, including where employers may be involved in assessment for work-based	Assessment is planned as part of an overall approach to ensuring that the student learning experience is a holistic one. Timing of assessment is such that it takes place at appropriate points to assess learning, be that at the end of a course, at a mid-point or by continuous assessment. Timing of assessments across Programmes is considered through the process of storyboarding, where Schools seek such support. Hosted jointly by CAD and the relevant Programme Co-ordinator, storyboarding events involve constituent Course Co-ordinators in taking a strategic overview of the Programme and award, then viewing the individual component courses and their ILOs followed by key activities in each course which help	Principles of Blended Learning (Webpage) Academic Integrity (Webpage) Webpage) Principles of Education(webpage)

learning programmes such as apprenticeships. Variety in modes of assessment meets a need. based on academic judgement. and is not just for the sake of variety. Variety helps develop a range of skills and competencies and assesses a range of learning styles - the variety itself should not become a barrier to learning. Assessment design needs to develop across stages as the student develops, as well as levels of study, as part of the overarching award design process and on an ongoing basis.

students to meet these (assessment, teaching delivery, feedback). By plotting these constituents of each course as a timeline against each other, a visual representation of the Programme emerges, allowing all concerned to see how all of the courses link to create the Programme and support the award, plus where the potential pinch points are. Staff can then agree amongst themselves how to address these. Within this process, any particular requirements for involvement of employers, placement requirements or other time away from the University can be clearly seen by all involved and its implications discussed and changes made as necessary.

On the back of these storyboarding sessions, CAD also provides, on request, a range of bespoke sessions for specific Schools to promote robust assessment design (including elements of both academic integrity [section 10 refers] and alternative assessment [section 4 refers] both as part of support for wider curriculum design and specific to individual course assessments. CAD have been working with schools to implement the TESTA programme (Transforming the Experience of Students Through Assessment). This is a method of reviewing the assessment and feedback practices at a programme-level to identify areas of enhancement. aiming to enhance the student learning experience by increasing student engagement through more varied assessment and feedback approaches.

Our principles for education, focusing on assessment, emphasize that assessments should "test learning outcomes and, where appropriate, be 'authentic'—reflecting or recreating real-life situations and enabling students to demonstrate the applicability of their learning to various disciplinary contexts and scenarios. They should assess skills and critical thinking rather than relying solely on factual recall and be streamlined to avoid over-assessment." Acrucial aspect of designing authentic assessments is that they encourage thoughtful consideration of the assessment mode and enhance variety in a manner that is appropriate and relevant to students' skill development.

4. Assessment is inclusive and	The Institutional Framework for Inclusivity and Accessibility in Education	Inclusivity and Accessibility Framework for Education
equitable.	ensures that all teaching, learning and assessment is fair, inclusive and	(Webpage)

	manual is maintained by Registry and available to all participants in	
	advance to enable training to focus on the policies via a step-by-step	
	presentation and a Q&A format.	
	Our provision of alternative assessments has become a major focus over	
	the past few years, building on work by the CAD and QAC to encourage	
	academic and other teaching staff to think more broadly about how	
	students can be assessed and how to assess their ILOs through more	
	authentic assessment modes that are not constrained by students'	
	individual learning differences or cultural requirements. This led, in 2021,	
	to a University-wide initiative driven by the Dean for Educational	
	Innovation to encourage alternative assessment modes to be adopted	
	more widely. Additionally, resources are available for Schools in relation	
	to the ongoing work to decolonise our curriculum and assessments.	

5. Assessment is explicit and transparent. Assessment policies, regulations and processes are explicit, transparent and accessible to all staff and students involved in the assessment process. Students are clearly informed of the purpose and requirements of each assessment task and the standards expected. Feedback on assessments explicitly relates to the stated learning outcomes and assessment criteria, and students have the necessary support to understand and interpret assessment criteria and how these are used to enable staff to recognise differential student achievement.	Assessments are approved via our curriculum approvals process as detailed in section 1, with all relevant policies, procedures and codes of practice related to assessment available via links opposite. All assessments are available to view in the University's Course Catalogue for every course, ensuring students have the opportunity to review and consider the assessments for optional and compulsory course choices in advance of starting their studies. The information advises students of the type of assessment, expected parameters in which the assessment will be conducted (e.g. word count) and the weighting of the assessment. Assessments are detailed further in individual Course Handbooks or available on MyAberdeen (the University's Virtual Learning Environment) for every course. These provide ILOs, deadlines by which assessments must be completed, deadlines for feedback to be returned to students and any other relevant information. Together these documents facilitate transparency in assessment information for students. As part of the CMS project the more detailed information on ILOs, feedback and assessment timing is being migrated from course handbooks to also be visible in the Course Catalogue. 6. Assessment and feedback is purposeful and supports the learning process. Assessment relates directly to course aims and learning outcomes, reflecting the nature of the discipline or subject and ensuring that students have opportunities to develop a range of knowledge, skills and attributes. Assessment is fit for purpose and methods are valid in	The Institutional Framework for the Provision of Feedback on Assessment sets out our principles of feedback, namely that it is timely, rewards effort, is understandable, relevant, constructive, and supportive. The Framework goes on to outline the approach taken with regards to marking and feedback, ensuring a supportive, consistent and fair system. Assessments and associated feedback align with intended learning outcomes, ensuring assessments measure students learning. Feedback on assessment should also identify areas for development ('feed-forward') and areas of good practice. Feedback should be constructive, helping students to understand what they have done well and providing them with information that will help them improve future	Institutional Framework for the Provision of Feedback on Assessment (Document) Feedback (Webpage) Feedback on Assessment (Webpage) Assessment and Feedback, Toolkit (Mdeo)

measuring achievement against learning outcomes. Assessment enables students to benchmark their current level of knowledge or skills, identify areas for improvement and make judgements about the overall progress made. Feedback (including 'feed-forward') reflects attainment relevant to learning outcomes and marking criteria for the assessment task. Feedback on assessment builds on dialogue and opportunities for students to reflect on their learning. The teaching and assessment strategy progressively enhances students' assessment literacy to enable them to increasingly regulate their own learning and performance.	 work and assessment. Guidance has been created on feedback on assessment, which is provided to staff to ensure that feedback remains constructive and feeds forward. Further information on feedback is also available on the University's webpages. CAD provides a range of development opportunities and interactive sessions for academic and other teaching staff and PGRs who teach and support learning, which include assessment and feedback. These include our AdvanceHE-accredited PG Certificate in H.E. Learning & Teaching and the popular Principles of Learning & Teaching in H.E. short programme for PGRs and others new to teaching. The Centre also hosts a range of open, drop-in discussion sessions addressing topics such as 'Providing Effective Feedback' and designing authentic assessments with a focus on appropriate discipline specific, skills development. 	
7. Assessment is timely. Assessment tasks and feedback are timed appropriately to promote student learning and facilitate improvement. Students are given sufficient time and opportunity to engage in learning and teaching activities that build their capacity for assessment. A holistic view of assessment deadlines can help to ensure that they are timed appropriately, to avoid overburdening students. Expectations in relation to feedback and feedback turnaround time for each assessment are consistent and clearly articulated. Feedback comments are provided in	Assessment is planned to ensure that the student learning experience is a holistic one. Timing of assessment is such that it takes place at appropriate points to assess learning, be that at the end of a course, at a mid-point or by continuous assessment. Timing of assessments across Programmes is considered through the process of storyboarding, where Schools seek such support. Hosted jointly by the Centre for Academic Development and the relevant Programme Co-ordinator, storyboarding events involve constituent Course Co-ordinators in taking a strategic overview of ILOs and then key activities in each course which help students to meet these (assessment, teaching, feedback). By plotting these constituents of each course as a timeline against each other, a visual representation of the Programme emerges, allowing all concerned to see where the potential pinch points are and then agree amongst themselves how to address them.	<u>Course and Programme Approval (Webpage)</u> <u>Academic Calendar (Webpage)</u> <u>Exam Diet Dates (Webpage)</u>

sufficient time to enable st to enhance their performa subsequent assessment ta	structure, implemented from academic year 2024/25, the formal exam	
8. Assessment is sufficient manageable. The scheduling of assignm and the amount of assesse required provides a reliabl valid profile of achievemer without overloading stude staff involved in the assess process. Assessment requirements take into acc the notional learning hour any given unit of study. Th spread, number and methe assessment are considered other, concurrent modules mind to ensure that the bu assessment is not excessiv example, an overview of assessment deadlines acro course of study is taken to 'bunching' where possible students' choice around m	and andThrough the curriculum management processes and approval via the Quality Assurance Committee (QAC), assessments are scrutinised and reviewed to ensure that they are sufficient and manageable for students, as well as staff. Course coordinators and programme directors are encouraged to look holistically at programmes and constituent courses to ensure that assessment is sufficient, appropriate and that the scheduling is manageable and not 'bunched' (section 3 refers).ount for endThe guidance documents in the form of Types of Assessment and Setting Assessments also provide relevant course coordinators information with regard to sufficient and manageable assessments.ount in rden of e. ForFor	Course and Programme Approval (Webpage) Quality Assurance Committee (Webpage) Types of Assessment, Academic Quality Handbook (Document) Setting Assessments, Academic Quality Handbook (Document)
9. Students are supported prepared for assessmen Students are given opport to develop assessment lite practise subject-related sk knowledge, engage with co and develop the competer required to meet learning	 and The University operates a variety of support mechanisms for students to ensure that they are well-supported for study and prepared for assessment. These include: Personal Tutoring: Each student is assigned a personal tutor as a contact for providing general academic and primarily pastoral support. 	Assessment (Webpage) Types of Assessments, Academic Quality Handbook (Document) Personal Tutoring (Webpage) Student Learning Service (Webpage) Feedback (Webpage) Academic Writing Skills, Toolkit (Webpage)

outcomes. This often involves formative assessment opportunities. Students are provided with appropriately timed feedback that is understandable, constructive and helps them meet their developmental needs. online resource sites in MyAberdeen. SLS works with students on a one-to-one basis to improve understanding and help implement feedback from marked assessments.

- Academic Writing Course: Some Schools provide Academic Writing Skills courses which are available to assess students' level of academic writing when they begin study in first year. These courses are facilitated by CAD.
- Induction: All Schools provide induction to their programmes during Welcome Week, during which students are informed of the support mechanisms available to them in terms of their teaching, learning and assessment. The University is implementing a new approach to broaden the scope of induction with the introduction of a week at the start of Terms 1 and 2 focussing on professional development and skills development of both new and returning students. These weeks will be in September and January to cover both our main undergraduate cohorts and January start cohorts, which also gives two opportunities through the academic year cycle for all students to focus on their professional development. Initial ideas (yet to be confirmed) are for the inaugural weeks to focus on the Aberdeen 2040 Attributes and Skills as the revised Induction Weeks are launched in academic year 2024-25.
- **Course Coordinators**: Course Coordinators support students by offering office hours to discuss any issues that may arise over the course of completing an assessment.
- Formative Assessment: Schools make use of formative assessments, which do not count towards the final course grade, to allow students the opportunity to develop their skills and prepare them for the summative assessment.

Support also takes the form of previous feedback and feed-forward. These provide students with constructive ways to improve and enhance their work, while supporting them to enhance their academic skills. This information can be found on our feedback webpages ('Your Academic Feedback').

10. Assessment encourages	AUniversity-wide approach across Schools aims to encourage academic	Code o
