

# Study a Language

# Broaden your horizons with a language

Language skills are essential for today's global citizens. You can choose from seven languages, French, German, Gaelic, Spanish, Arabic, Swedish, and Mandarin.

With another language, you can:

- Increase your employability
- Access more opportunities across the world
- Expand your options to study abroad
- Broaden your understanding of other cultures and societies

We offer beginner and advanced routes in a range of languages, and several ways to study:

- As a Joint Honours degree
- As a complete beginner or an experienced learner, study any of our language options alongside many degree programmes, including many of our Science and Engineering degrees (timetable permitting)
- As part of our 'Sustained Study' programme during the first two years of your degree
