Advances in Health Sciences Education

Theory and Practice

Special Issue – May 2017

THE SCIENCE OF SELECTION INTO HEALTHCARE: INTERNATIONAL INSIGHTS AND A FUTURE RESEARCH AGENDA

- ▶ Comprising a combination of empirical papers, reflection pieces, and editorials
- ▶ Contributions from renowned international academics
- ▶ Covering a breadth of topics relating to selection, including: selecting for creativity and innovation potential, hidden item variance in multiple mini-interview scores, the relationship between extracurriculars and medical school performance, and narratives of intercultural professionalism dilemmas

CURRENT, IN-DEPTH
RESEARCH ON
SELECTION ISSUES
REFLECTING
THREE CORE THEMES:

1

Selection for important non-academic attributes

2

Widening access and diversity in selection

3

Evaluating the quality and validity of selection methods
