

PIRRIST:

Developing a Patient & public Involvement intervention to enhance Recruitment and Retention In Surgical Trials

- Find out how patient and public involvement (PPI) could help improve recruitment and retention in surgical trials
- Hear about the findings of our research into recruitment, retention and PPI issues in surgical trials
- Learn about the PIRRIST recommendations for PPI in surgical trials
- Help us develop practical guidance to support trialists in implementing these recommendations

Tues 19th February 2019
11:00 – 12:30
Level 2 Seminar Room,
The Rowett Institute

**Speaker: Dr Joanna Crocker, Research Fellow in
PPI Impact Assessment, University of Oxford.**

The PIRRIST project has been funded by the NIHR Oxford Biomedical Research Centre and the Network of MRC Hubs for Trials Methodology Research. It is a nationwide, collaborative project including patient and academic partners from the universities of Oxford, Aberdeen, Birmingham, Bristol and Liverpool.
