

**SAFETY & RELIABILITY ENGINEERING FOR OIL AND GAS (ONLINE) (MSc/PgDip/PgCert)
57H1DGB1/61H1DGVX/62H1DGVZ**

Duration: 27- 60 months part-time.

Content: The aims of the programme are to provide education and training at postgraduate level for graduate engineers in the general area of safety, reliability and risk management. Candidates shall be required to complete the following programme of courses:-

Distance Learning students will be expected to propose their own project and to seek an industrial supervisor. It is envisaged that most students studying part-time distance learning will undertake the necessary research for their project in their place of work. The subject for a student's dissertation will be approved by the Programme Co-ordinator.

Year 1

EG501D Fundamental Safety Engineering and Risk Management Concepts (15 credit points)
EG501E Statistics and Probability for Safety, Reliability and Quality (15 credit points)
EG551D Advanced Methods for Risk and Reliability Assessment (15 credit points)
EG551E Applied Risk Analysis and Management (15 credit points)

Year 2

EG501G Fire and Explosion Engineering (15 credit point)
EG55Q4 Process Design, Layout & Materials (15 credit point)
EG55Q5 Human Factors Engineering (15 credit point)
EG502T Offshore Structures & Subsea Systems (15 credit points)
EG5910 Safety Engineering Individual Project (60 credit points) (this course will continue into Year 3).

Year 3

EG5910 Safety Engineering Individual Project (60 credit points)

Assessment: By written examination and course work as prescribed for each course. In addition, MSc candidates must submit a dissertation project, and may be required to undergo an oral examination. The Degree of MSc shall not be awarded to a candidate who fails to achieve a CGS Grade of D3 or above in the individual project, irrespective of their performance in other courses.
