

SCOTMAC

A wide-angle photograph of a vast, icy sea under a sunset sky. The water is covered in numerous ice floes of various sizes. In the center-right, a person in dark winter gear stands on a large, flat ice floe, looking out towards the horizon. The sun is low on the horizon, creating a warm, golden glow that reflects off the ice and water. The overall scene is serene and evokes a sense of adventure and exploration in a polar region.

SCOTLAND MODEL ARCTIC COUNCIL 2

10-12 MARCH 2023

GLASGOW | SCOTLAND | UK

[SCOTMAC.POLARASPECT.COM](https://scotmac.polaraspect.com)

THE CONFERENCE

SCOTMAC is one of the only Model Arctic Councils in the world today designed with undergraduates in mind. Students play the roles of delegates from Arctic states and, unusually in model diplomacy, Indigenous peoples. Their challenge is to negotiate unanimous consensus on some of the most pressing questions facing not only the Arctic and its communities, but by extension our world as a whole.

THE ARCTIC

As the global climate changes, the Arctic has become one of the most important regions on the planet. It is also one of the most fascinating. More than a pristine wilderness, or a storehouse of great natural wealth, it is home to Indigenous peoples with ancestry there since time immemorial. In the Arctic, questions of environmental protection, sustainable development and ancient culture overlap in complex ways.

THE PROGRAMME

SCOTMAC 2 features expert teaching and guidance from Arctic specialists, three days of diplomacy at which to hone valuable speaking and consensus-building skills, and social events at which to build lasting friendships with fellow delegates from universities in Scotland, the rest of the UK, and beyond. Find out more and register for your place at scotmac.polaraspect.com.
